

UCLA CTSI

TRANSLATIONAL SCIENCE SEMINAR

Translation in Practice: Advancing HIV Treatment and Prevention for Everyone

TUE, OCT 15

12:00PM-1:00PM

**MacDonald Research
Laboratories (MRL) RM 1-441***

**Space is limited.*

The tools to bring a halt to new HIV transmissions have long been available, however, many people at risk for or with HIV struggle to remain on these medications. Long-acting injectables present new strategies for addressing these issues. Hear scientists discuss different phases of the journey of this innovation from the lab to addressing current implementation challenges in communities.
